

Wheel Measurement

General Note
 Given dimensions are related to the Brake system. Brembo recommends a minimum clearance of 3mm between the caliper and the wheel spoke or rim.

Example

1B1.8006A for Chevrolet C5 Corvette
 - With a straight edge, measure from the

middle of the wheel center bore out to 122 mm for the location of the bottom of the caliper.

- Now measure down from the straight edge to the back of the wheel spoke for the system's "A" measurement. This system needs 49mm or more to leave sufficient caliper clearance.
- Repeat these (two) steps for caliper clearance through to the top of the caliper.
